

# Capital Expenses Estimation for WiMAX Networks

## Overview

If you are interested in deploying a WiMAX network then you are trying to figure out how much equipment you might need. You are asking yourself questions such as “How much it might cost?”, “What impact does changing the coverage area have on the bottom line?”, “What impact does changing the data rate or throughput have?”, and more. The answers to these questions depend upon the types of services you are planning to provide as well as the demographics of your intended coverage area. This publication provides a framework for answering these questions.

## Table of Contents

- Introduction.
- Key Elements of a WiMAX Network.
- WiMAX propagation..
- Urban Area Planning.
- Suburban Area Planning.
- Rural Area Planning.
- Capacity vs. Coverage.
- Customer Location Issues.
- Oversubscription as a Factor in Planning.
- Coverage Comparisons: Urban vs. Rural
- Estimating Base Stations for Capacity.
- Urban Analysis.
- Rural Analysis.
- WiMAX Coverage.
- Capital Expense Evaluation..
- Subscribers and Revenue.
- Capital Expense for BTS Deployment
- Analysis Summary.

## Table of Figures

- Figure 1: Key elements of a WiMAX network
- Figure 2: RF Signal propagation
- Figure 3: Dense Urban Area
- Figure 4: Urban Area
- Figure 5: Suburban Area
- Figure 6: Rural Area
- Figure 7: Tradeoff between Coverage and Capacity
- Figure 8: Where are the Customers Located?
- Figure 9: Oversubscription
- Figure 10: Coverage Example
- Figure 11: Capacity Example
- Figure 12: Equipment Pricing
- Figure 13: Subscribers and Revenue
- Figure 14: BTS count and Capex
- Figure 15: Revenue vs. Capital Expense

## Report Title

**Capital Expense Estimation for WiMAX Networks**

## License Type

Single User License ..... \$ 295 USD

Company License ... \$ 995 USD

Team License (2-5 People)... \$ 665 USD

Other Licensing Options: Inquire with Mind Commerce

## Family/Surname

## First Name

## Position

## Company

## Address

## Country

## Post Code
