

Service Delivery Platform

Solutions and Market Opportunities

Overview:

This report bundle represents the most informative research on the market for Service Delivery Platforms (SDP) solutions and market opportunities. It evaluates the potential for SDP as a dependable, scalable and flexible platform for core business functions, next generation applications, and independent services. SDP is examined within the context of its relationship to the Service Oriented Architecture (SOA) and the objectives to respond more rapidly to shifts in market conditions, customer demands, new revenue opportunities, and competitive threats.

The report package includes revenue forecasts by geography, function, and media type from 2011 through 2017.

Recognizing the view that the future of telecom applications will be driven by IP Multimedia Subsystem (IMS), yet IMS is expensive and will take much longer to implement than SDP, Mind Commerce also provides forecasting and analysis into the market for IMS applications.

This publication package will also help the reader understand the basics of SDP and IMS architecture, functionality and capabilities.

Audience:

This report bundle is a complete package for anyone considering:

- Pro's and Con's of launching IMS vs. SDP based applications
- Future prospects for IMS and SDP applications and revenue
- SDP and SOA based networks and applications as a bridge to IMS
- Challenges in implementing IMS vs. SDP

Table of Contents:

This report package includes the following Mind Commerce Publishing publications:

[Service Delivery Platforms The SOA-enabled Path to Integrate Legacy and IMS Networks \(with Revenue Forecast 2011-2017\)](#)

[Monetizing the NGN Investment: Market Prospects and Business Case for IMS and SDP based Applications](#)

[IP Multimedia Subsystem \(IMS\): The Market for Applications and Services 2011-2016](#)

[IP Multimedia Subsystem \(IMS\) Status Report: Emerging from the Trough of Disillusionment](#)

[IP Multimedia Subsystem \(IMS\): The Commercial Rollout of Applications](#)

[Network Monitoring in Transition: Opportunities in the shift to IP/IMS](#)
